COLLARDS: For winter greens.	
ENDIVE: That bitter twang you need for salad	

**Victory Gardens Are Fun . . . and it's good exercise, too!**

**Use Vigoro, The Complete Plantfood on Your Victory Garden.**

# Here's How To Have A Rich Green Lawn This Fall Winter and Next Spring

We have had so many requests for information on the sowing of lawns to winter grass after Bermuda browns in early fall that we have prepared the following outline which is based on our observations and experience:

1. The lawn should be mowed and cut close.
2. Now the lawn should be raked thoroughly with a sharp toothed rake, removing all dead grass and leaves.
3. Then apply 4 pounds of a COMPLETE plant food per 100 square feet and rake off the grass blades into the soil. This will help the winter grass to make a quick and vigorous growth.  
(Vigoro can again be used for lawns)  
Proper feeding with a complete balanced plant food is one of the most important factors in having a beautiful lawn because winter grasses are heavy feeders. Growing under adverse conditions as they do they need special care and feeding.
4. Now you are ready to seed your winter lawn. Use 10 pounds of good winter grass seed per 1000 square feet, scattering it evenly by hand or with a fertilizer spreader. Rake the seed in thoroughly to get as much of it through the matted Bermuda into the ground as possible. Better still, top dress with leaf mold, peat moss, or sand.
5. Sprinkle the lawn and continue to sprinkle frequently until the seed germinates and makes a good growth.

This simple and inexpensive program will give you a beautiful green lawn within a very short time that will be the envy of the neighborhood throughout fall, winter and spring.

Stop in the next time you are near our store, and let us show you our specially selected seeds and other lawn-making supplies.

Bulbous Iris

**We have fertilizer distrubtors and lawn rollers that we are pleased to lend customers who buy seed and fertilizer from us**

## SEASONABLE REMINDERS

What to Plant	How	Approx. Height	Recommended as—
Alyssum	Flats or Open	4-6 in.	A popular border plant.
Anchusa	Open	1½ ft.	Effective bedding and border plant.
Antirrhinum (Snapdragon)	Flats	2-3 ft.	Makes colorful beds and borders.
Calendula	Flats or Open	1-1½ ft.	A good bedding plant. Favorite cutflower
Candytuft	Flats or Open	1 ft.	Good for beds and borders.
Cornflower (Ragged Robin)	Open	2½ ft.	Borders and cutting purposes.
Columbine	Flats	3-5 ft.	Cutflower.
Daisy, Shasta	Flats	2½ ft.	Good for mixed perennial borders
Delphinium	Flats	4-5 ft.	Showy plant for perennial borders.
Dianthus	Flats or Open	1 ft.	Bedding and border plants.
Escholtzia (California Poppy)	Open	1-3 ft.	Border and beds.
Forget-Me-Not	Flats	1 ft.	Attractive border plant; suitable for cutting.
Gypsophelia	Open	1½ ft.	For beds and borders.
Hollyhock	Open	6-7 ft.	Backgrounds and groups of flowers.
Larkspur	Open	4-5 ft.	Cutflower.
Lupins	Open	1½ ft.	Effective in beds and borders.
Pansy	Flats	6 in.	Excellent for massed beds and borders.
Petunia	Flats	1-1½ ft.	Used in beds, borders, porches and window boxes.
Phlox, annual	Flats or Open	1 ft.	Effective for massing in beds and borders.
Poppies	Open	2-6 ft.	Colorful beds.
Salpiglossis	Open	2-3 ft.	Good bedder velvety flowers.
Schizanthus	Open	2-3 ft.	Bedding plant—Called Poor Man's Orchid
Stocks	Flats	1-2 ft.	Favorite for borders, beds and cutting
Sweet Peas	Open	4-5 ft.	Cutflower, used for covering low trellises.
Sweet William	Flats or Open	1½ ft.	Valuable for use in mixed beds or borders.
Texas Blue Bonnet	Flats	1-1½ ft.	For naturalizing and rockies.
Torenia	Open	6-12 in.	Suitable for planting in partial shade.
Verbena	Flats	1 ft.	Adaptable to beds, borders and porch boxes.

We recommend the use of Nitrogen inoculation for Sweet Peas, Lupins, and Texas Blue Bonnets. This may be purchased in small packages and will greatly improve the flowering and growth of the plants.
